The Statistical Learning and Data Science Group – Selected Topics from Research and Applications

Bernd Bischl

(Statistical Learning and Data Science,
Department of Statistics, LMU Munich)

02.02.2022, 16.00 (c.t.)

Online via Zoom
(Meeting-ID: 913-2473-4411; Password: StatsCol21)

As part of the presentation series of the working groups at the Department of Statistics, the Statistical Learning and Data Science group gives an overview of its work.

After a general introduction of the group's organization and research areas, we will give a more detailed view into selected topics from the various focus groups, namely

- Interpretable and Automated Machine Learning
- Probabilistic Machine Learning and Survival Analysis
- Semi- and Unsupervised Methods,

and briefly introduce the newly founded Machine Learning Consulting Unit (MLCU).
